Smith's Choice

Oriental and Domestic Novelties

Oriental Countries have Vegetables most of us never heard of, they are good—try them.

JAPANESE RADISH or DAIKON

Radish, Nerima Long (See page 3 for prices and discription)

Smith-Dewitt Seed Co.,
Auburn, - New York

CABBAGE SHANTUNG

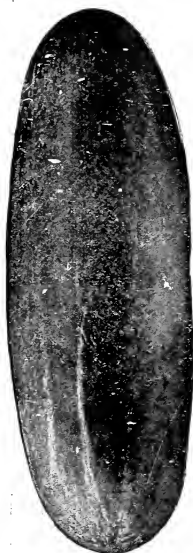

A production of Shantung, a province of China. Distinctive flavor, very mild and pleasant. The outside leaves grow to a large, round leaf, the heart is snowy white with compact leaves tightly held together. We recommend this as a most excellent sort for either home garden or market planting. Pkt., 10c; 3 pkts., 25c.

No family garden complete without Oriental Novelties. Try some. See list of Domestic Seeds.

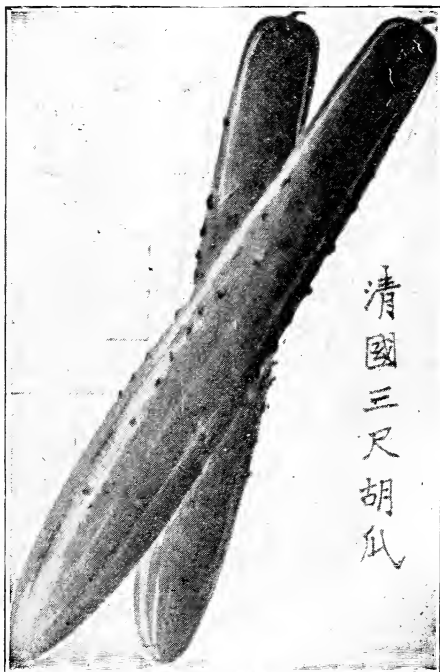

PE-TSAI, SHANTUNG. CHINESE CABBAGE

Italian Cucumber

This is a very early variety. It is quite a large grower and highly recommended to use when very young. It is an excellent Cucumber for the table, being of a dark green color and always of good flavor. This is the favorite among Italians and we believe is quite a curiosity in any garden. Pkt. 5c; oz. 20c.

ITALIAN CUCUMBER

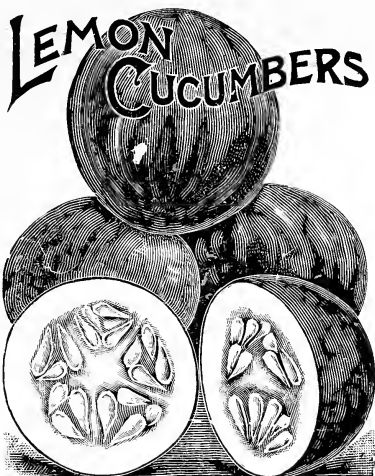

CUCUMBER-CHINA

A remarkable long green cucumber from China. The mature fruit is 20 inches or over, and 2 to 3 inches in diameter, of deep green. The flesh is solid, crisp and of fine flavor. Vines are strong, vigorous and productive. The fruit is fit for use almost as early as the shorter varieties. We recommend this variety and everyone should plant them. Pkt. 10c, oz. 40c.

LEMON CUCUMBER

Is nearly round, the skin is smooth with yellow markings. The fruit grows from 2½ to 3 inches in diameter, flesh is tender and has a flavor surpassing all other cucumbers. It is excellent for pickling, either green or ripe. For table use it should be used just as the fruits are turning yellow. It is a real novelty, and we are sure, after once tested, it will be planted every season, for the quality and productiveness are sure to please everyone. Pkt., 10c; oz., 25c.

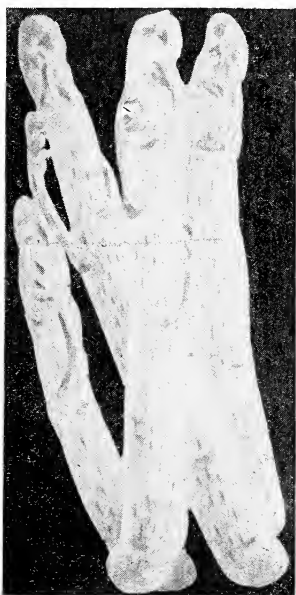

Japanese Climbing Cucumber

JAPANESE CLIMBING CUCUMBER

This variety came from Japan and is a first-class Cucumber. Young plants grow very bushy but as soon as they become established begin to climb and may be grown on trellises, fences or poles making it quite a curiosity. The vines cling so tightly that they are not prostrated by heavy storms or wind or rain. They grow very fast, beginning to produce fruit early and continue throughout the season. The fruit grows to a good size for home use and produce but very few seeds. Our stock seed came direct from Japan. Pkt., 10c; oz., 20c.

"Udo" Jap Salad Plant.

A valuable Japanese vegetable grown in beds and cut like asparagus. It has been tested in climates ranging from Nova Scotia to the far south, and it has proved prolific. Seeds have produced shoots, six feet long with a heavy root system, in a single season. It differs from asparagus while asparagus shoot tips only edible, the whole of the UDO stalk is stringless and tender. The shoots are delicate and white, and beds continue, bearing from eight to ten years without re-planting. It is made into soup in which the whole stalk is used or boiled and served on toast with butter sauce like asparagus. But the favorite native way of serving is to slice the shoots into thin shavings, chill them on ice, and serve with salad dressings. Pkt., 10c; ½ oz., 40c; oz., 75c. postpaid.

Arolia Cordata, "Udo" Japanese Salad Plant

ORIENTAL RADISH

JAPAN MIYASHIGE

Grow more than two feet long and over 3 inches in diameter. Are very richly formed; solid and fine sugary flavor. Skin is a beautiful white and green in top. Keeps well, firm and crisp for a long time. Grows easily everywhere. Sow according to the following schedule: San Francisco and vicinity, early August; Southern States, late August; Northern States, in early July. Pkt. 10c, ½ oz., 25c, oz., 45c.

JAPAN MIYASHIGE

All Seasons Radish Mixture

All Seasons Radish Mixture This is by far the best Mixture of Radishes ever offered, containing all shapes, sizes and colors. A supply of this seed will be just the thing for small gardens, when space is limited and you want to make a garden and be done with it in one sowing of seed. By sowing this seed you will have Radishes very early and continue all the season, having all leading early, medium, late and Oriental sorts. If no other seed is ordered you should try this collection and convince yourself that it is all we claim. Pkt., 10c; oz., 15c; ¼ lb., 50c, postpaid.

TOKINASHI OR ALL-SEASON

RADISHES

JAPAN TOKINASHI OR ALL-SEASON

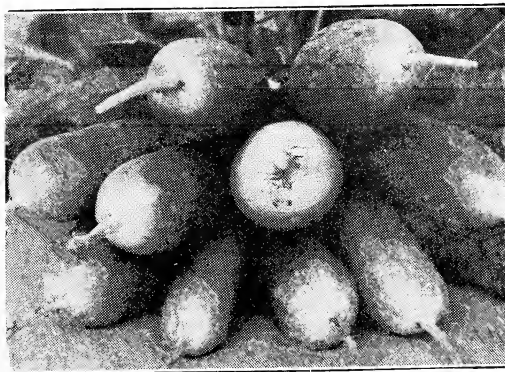

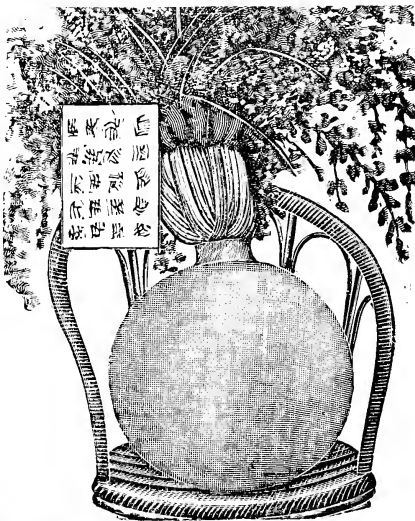

The best known and most popular all-season radish. Color: beautiful white, flesh brittle and firm, pungent with fine flavor. This strain will stand heat without becoming pithy. Good for cooking or raw, and may be eaten from the time it is half an inch through until it measures 15 inches long and 2 inches in diameter, its full size. Pkt. 10c, $\frac{1}{2}$ oz., 25c.

JAPANESE RADISH "SAKURAJIMA"

The skin is pure white, flesh firm and solid, mild as an apple. Thrives in any soil or location. The taste is more delicate than our American Radishes. It is always crisp and tender, and at the same time is one of the greatest curiosities ever grown in the garden. On account of its mild and excellent flavor, can be sliced and eaten like an apple. Pkt. 10c, 3 pkts. 25c, oz. 45c.

California Mammoth White Winter Radish

Grows to a larger size than any other White Winter Radish. We have grown specimens measuring seven inches in diameter and about 18 inches in length, weighing 8 pounds. It is the only American Radish growing to this immense size, and still retaining a mild pleasant flavor. We have known our customers storing them in the cellar as you would turnips, and having a supply of Radishes until late in the winter. It is an excellent table variety. Pkt. 5c; oz., 15c; $\frac{1}{4}$ lb. 45c, postpaid.

FRENCH BREAKFAST RADISH

FRENCH BREAKFAST

A very reliable variety, is early, bright scarlet in color, tender, crisp and an excellent variety for forcing in frames for early market, and is one of the quickest growing sorts and it being a beautiful rose scarlet, with a white tip, recommends it everywhere. Pkt., 5c; oz. 15c; $\frac{1}{4}$ lb., 40c, postpaid.

NEW TOMATO PEPPER - A Unique Novelty

This Pepper very much resembles a red Tomato in shape and general appearance. Many people when first seeing it call it a Tomato. It makes an upright growth and is distinct from any other; enormously productive and so mild it can be eaten out of the hand like an apple. It bears from June until Fall and will out-yield any other Pepper. It will attract attention wherever grown. The illustration shows shape. Pkt. 10c., 8 pkts. 25c.

EGG PLANT--CHINESE WONDER

Treat like a tender tomato but requires even a longer period to mature. After early cabbage plants are out of the hot-bed or green house, sow eggplant, keeping the temperature above seventy degrees. One ounce of seed gives two thousand plants and four ounces plants an acre. Transplanted later to pot or to a three or four-inch stand, and when 8 inches high, put outside on rich, well-drained land. These Japanese varieties grow on small bushes and they may be planted much closer than the American sort.

The fruit is oblong, attaining a length of 15 to 25 inches, with beautiful purplish-pink color. The skin is very thin and flesh is tender with very few seeds.

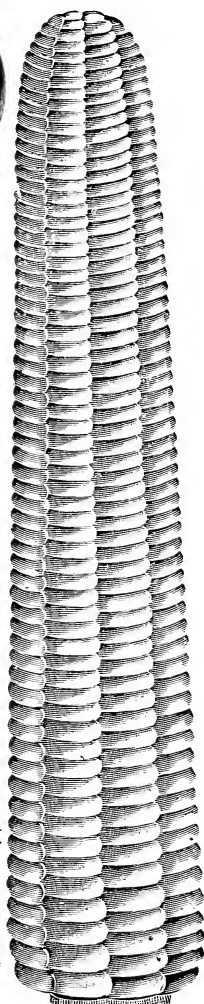

Plants are hardy and prolific. Is excellent for pickles, fried or stewed. Easy to grow. Pkt. 10c; ½ oz., 50c.

American Giant Pop Corn

Grows medium size stalks, producing from 2 to 3 perfect ears from 8 to 10 inches long—see cut—Large Pearl White Kernels that pop to nearly twice the size of other Pop Corn. Very tender and of a fine flavor. Truly a wonder in the Pop Corn family. Grown under our own supervision. Don't fail to try some if only a few packets. Large pkt., 8c; 3 for 20c; ½ lb., 30c; lb., 50c postpaid.

Everyone eats Pop Corn. Try our American Giant. None better.

AMERICAN GIANT

Chameleon Egg Plant

An interesting plant less decorative by its flowers than by its fruits, which are rather large, but flattened, and have strong ribs, similar to a tomato of the old type. This new Tri-Color Egg Plant passes from white to an intensive yellow; later into a brilliant scarlet, changing color like a chameleon, producing fruits in abundance. They keep well and there are always fruits of the three different colors on the plant.

Chameleon Egg Plant

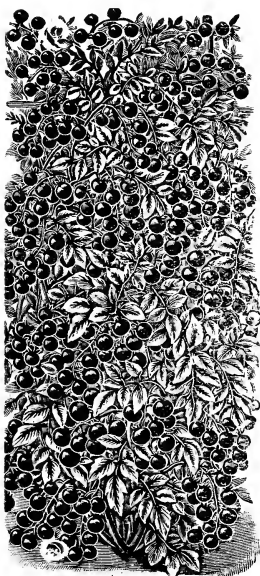

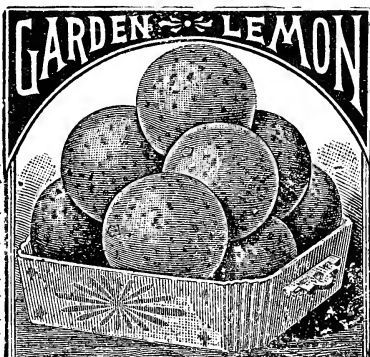

Garden Lemon

Somewhat resembles the Vegetable Orange in growth but is distinct. The unripe fruit is striped with very dark green and when ripe is not so yellow. The fruit is the shape shown in the illustration, but a little larger than the Vegetable

Orange. It has fine flesh and is of good flavor and is unexcelled for general canning purposes. It should be cultivated the same as musk melons. Pkt. 5c, 3 pkts., 12c.

THE TOMATO GRAPE

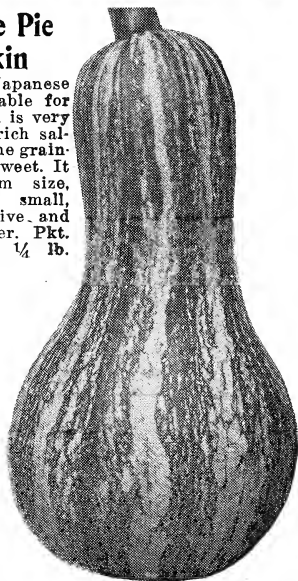

Can easily be trained to an arbor, veranda, trellis or fence like a grape vine. It grows rapidly and will produce ripe fruit in four months from seed. It is about the size of a Concord Grape, but of Tomato flavor, and is fine for cooking and canning and exceptionally good for preserving. Plants grow very rapidly and should be cared for same as Tomatoes. Pkt. 6c; 3 pkts., 15c.

Tomato Grape

Japanese Pie Pumpkin

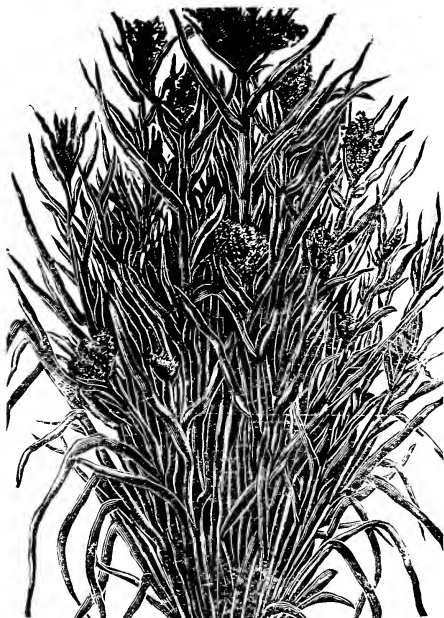

This is a Japanese variety, valuable for cooking; flesh is very thick and a rich salmon color. Fine grained, dry and sweet. It is of medium size, seed cavity small, very productive, and a good keeper. Pkt. 6c; oz. 15c. 1/4 lb. 50c, prepaid

Japanese Pie

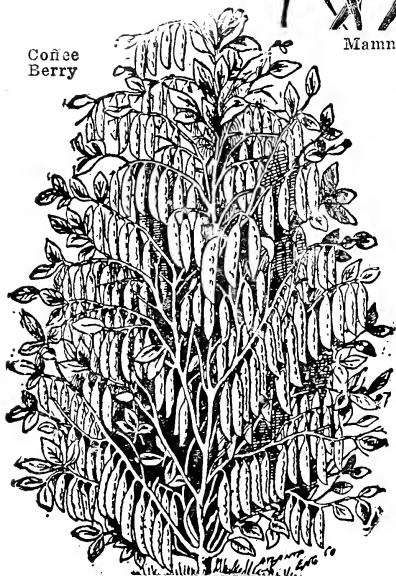

TEOSINTE

A forage plant that was brought to this country some years ago and resembles corn somewhat, but a much broader leaf and sweeter. Very rapid growing plant after it has attained a height of 5 or 6 inches and grows to a height of 11 feet. It suckers more than other foliage; often producing 25 to 30 stalks. It can be cut when two or three feet high, after which it will rapidly grow up and as many as four crops have been cut during a season. The amount of forage per acre is something immense; in many cases 150 tons. It should be planted in hills two feet apart each way and three pounds for one acre. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb., 55c; $\frac{1}{2}$ lb., \$1, postpaid.

Mammoth Teosinte—A Forage Plant

Coffee Berry

Domestic Coffee Berry

This Berry or Bean is easily grown in any garden soil and is very prolific. The plant grows very strong, producing pods containing the coffee berries. It makes an excellent drink, very nearly equal to good Java coffee. It can be planted in May and cared for the same as beans, and will be found as good a substitute for coffee as any cereal used. Do not fail to plant a few in your garden this year, and see what they will produce. Pkt., 10c; 1 oz., 30c, postpaid.

NEW YORK OR WONDERFUL LETTUCE

It is claimed that this is the king of all main crop lettuce, forms immense heads as solid as a cabbage, often 15 inches across. Quality is excellent, heads being creamy white inside and free from bitterness. It is slow to run to seed, and sure header under all conditions. A large growing variety, resisting dry, hot weather, and we recommend it as a standard garden variety. Pkt. 5c, oz. 15c. $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 95c, postpaid.

BRUSSELS SPROUTS

PLANTING DIRECTIONS—1 ounce for about 3,000 plants.

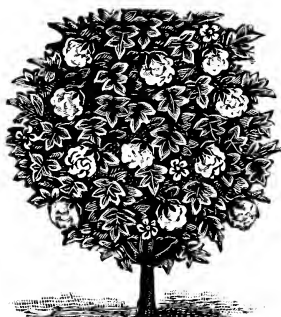

The culture is similar to that of cabbage. Sow the seed in boxes or in frames under glass and transplant to the open ground in June. Can also be sown in the open ground and transplanted in rows 2 feet apart and 15 inches between the plants in the row. A good plan is to break the leaves in fall to give the heads more room to develop. Set out plants latter part of June for a winter supply.

IMPROVED BRUSSELS SPROUTS, A GOOD KEEPER

Perfection—We consider this the best variety grown. It is very tender, good flavor and stands the frost quite well. Grows a stem 2 ft. high, and on this produces sprouts 2 inches in diameter, resembling miniature cabbage. Pkt. 10c, 3 pkts., 25c.

Ornamental Cotton

The cotton is snow white. Grows easily from seed. Be sure to place your order for a little of the seed. Pkt. 5c., 3 pkts. 12c.

BABY GOLDEN—This is the smallest Pop Corn in existence, but is very prolific, growing from five to ten ears on a stalk, each from 1¾ to 2½ inches long. Kernels are gold-

Pop Corn

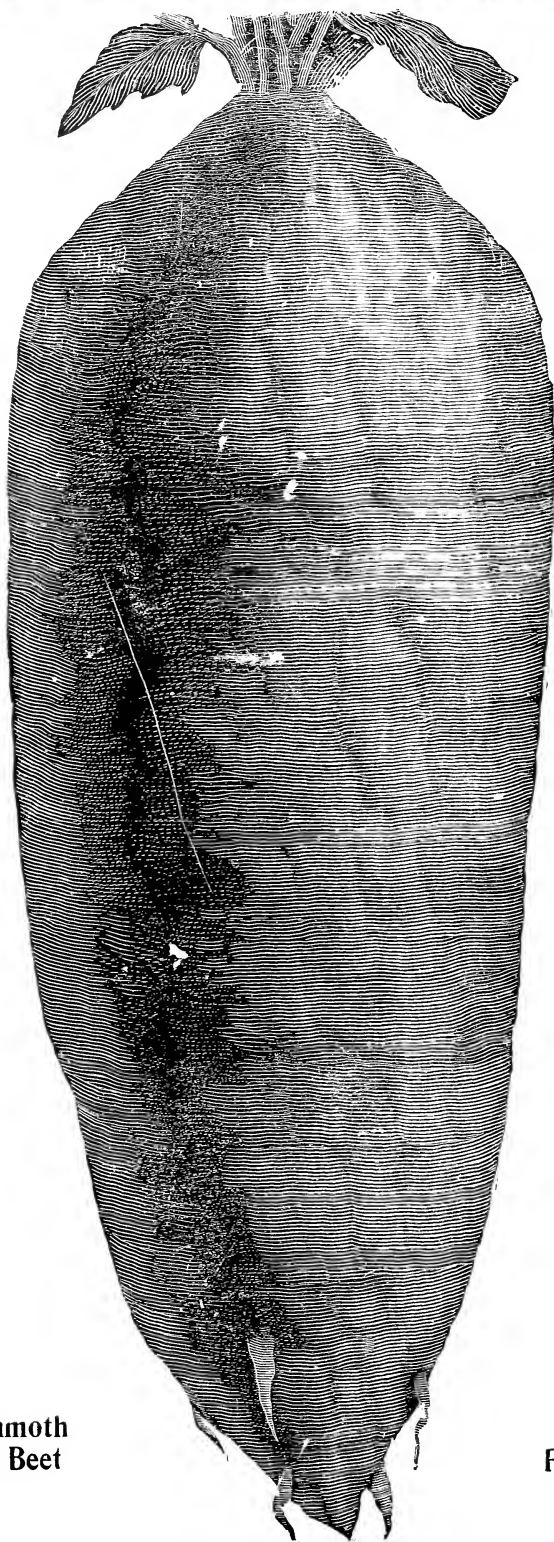

en color of rice type. Pops excellently. Pkt. 6c, 3 pkts. 15c.

SMITH'S MAMMOTH PRIZE LONG RED MANGEL BEET

This is the most popular Long Red Mangel; sometimes called "Giant" or "Jumbo." It is the largest variety we know of. Grows about two-thirds out of the ground and we have frequently grown them to weigh 30 lbs. each. It has produced over 60 tons to the acre. It is not coarse grained, even when attaining enormous weight. It is one of the very best for cattle sheep and poultry feeding during winter and those desiring a good Red Mangel will certainly want this one, as it always produces roots of good size and quality. French grown seed. Pkt. 5c., oz. 10c., ¼ lb. 38c, ½ lb. 70c, lb. \$1.35, postpaid. (See page 10.)

FRENCH MANGEL WURZEL

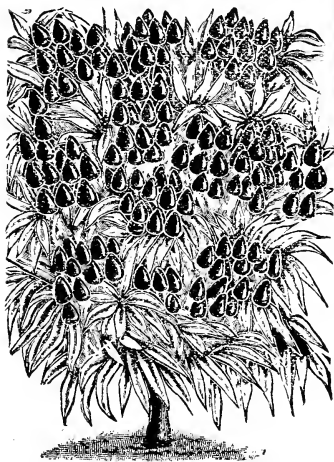

**Mammoth
Prize Beet**

**Long
Red
French**

For Description and Prices See Page 9

Mammoth Spanish Peanuts

Can be successfully grown where corn succeeds. This variety is prolific, every part is useful; vines valuable feed for horses, cattle and sheep; producing one to two tons of vines per acre, while the nuts contain a large per cent of rich nourishment. They do best on light sandy soil, but will produce a good crop on any open soil when it is plowed deep and carefully tilled. Pkt., 10c; $\frac{1}{2}$ lb., 30c; lb. 50c. postpaid.

Pepper

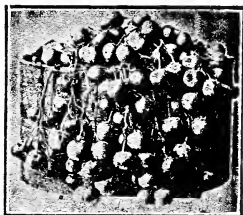

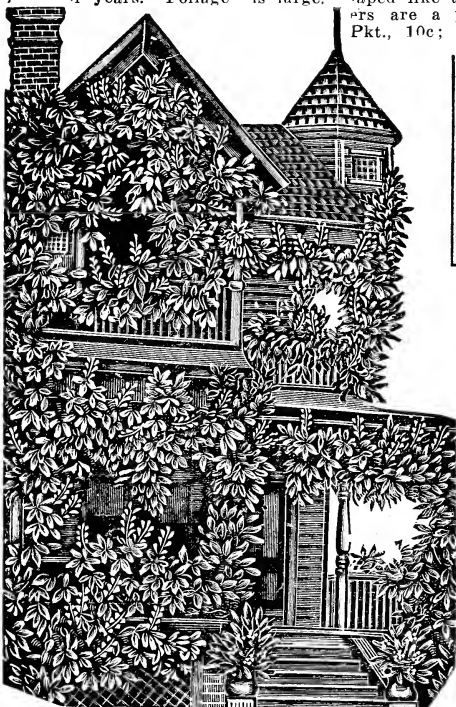

MEXICAN BOUQUET

This is very interesting, grows $1\frac{1}{2}$ feet high and is very prolific, always producing a large number of clusters of peppers in the form of a bouquet, has from 12 to 36 cone-shaped fruits to each bouquet. It makes a beautiful plant and can be grown in pots and under the same treatment as that of the geranium. Pkt. 10c.

THE JAPANESE KUDZU VINE

....(Jack and the Bean Stalk Vine)

This comes from Japan, the land so productive of curious and ornamental flowers. With ordinary treatment it will grow 75 feet in one season, filling the air with the fragrance of its large clusters of wistaria like blossoms. It requires very little care and in three months this wonderful vine progresses as much as most vines do in five years. It is perfectly hardy, lasts for years. Foliage is large, shaped like the leaf of a bean. Flowers are a pleasing shade of purple. Pkt., 10c; 3 pkts., 25c.

Hybridized Potato to Seed

Are one of the Rarest and Most Wonderful of Seeds. Every Seed will produce a different variety of everything in the Potato Line. It is from such seeds only that valuable new sorts are produced.

These Rare and curious Seed Balls—will produce white, yellow, pink, red, blue, purple, variegated and black Potatoes. Often 50 to 100 in a hill. Of shapes, types and qualities innumerable. Early and late strange freaks, etc. Package with full directions. 15c, 4 for 50c; 10 for \$1.00.

ASTERS

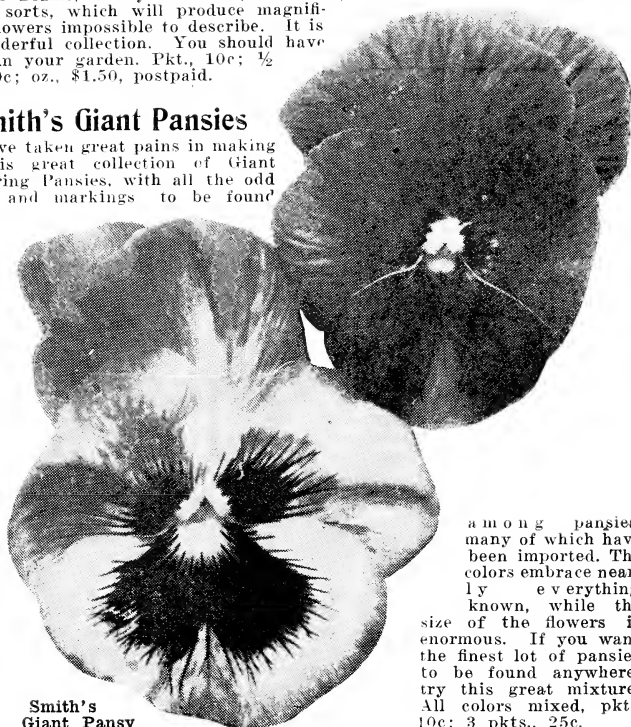

SMITH'S GIANT FLOWERING

If you want the greatest variety of asters ever collected, you should grow this mixture. It contains more than a hundred different varieties, each variety made up of several separate colors selected from such classes as the Dwarf Victoria, Comet, Lilliput Flower, Large Globe Flowered, Christmas Tree, Princess, Lady Mignon, Pearl, Victoria, Ball or Jewel, Ostrich Plume, Peony Flowered, Tall Chrysanthemum, and a great many other sorts, which will produce magnificent flowers impossible to describe. It is a wonderful collection. You should have some in your garden. Pkt., 10c; $\frac{1}{2}$ oz., 90c; oz., \$1.50, postpaid.

Smith's Giant Pansies

We have taken great pains in making up this great collection of Giant Flowering Pansies, with all the odd colors and markings to be found

Smith's
Giant Pansy

among pansies, many of which have been imported. The colors embrace nearly everything known, while the size of the flowers is enormous. If you want the finest lot of pansies to be found anywhere, try this great mixture. All colors mixed, pkt., 10c; 3 pkts., 25c.

MORNING GLORIES**GIANT JAPANESE**

This is a giant type producing handsome colors, shapes and markings and make one of the most beautiful climbers. Our choice mixed strain embraces all the shades to be found among Morning Glories, and must be grown to be appreciated. Choice Mixed. per pkt. 6c, 3 pkts. 15c.

**JAPANESE HOP VINE**

This is a handsome vine, growing from twenty to thirty feet in a season. The leaves are striped and variegated, making a charming effect. It is a rapid summer climber and one of the best plants for covering verandas, trellises, etc. Heat, drought and insects do not trouble it. Pkt., 10c; 3 pkts., 25c.

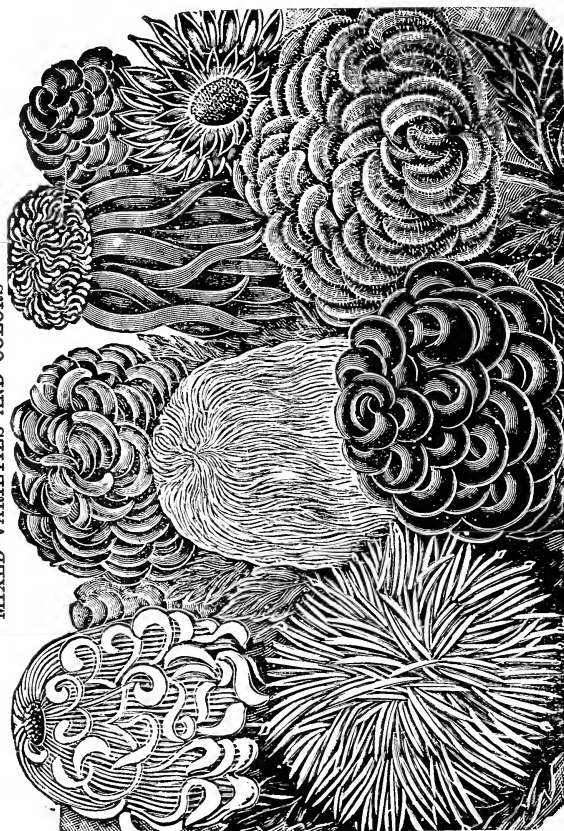

SWEET PEAS**Giant Flowering Mixture**

We have made up this mixture of all the large fine flowering varieties as well as the different colors, and will guarantee no better collection can be found.

Plants grow rapidly and produce an abundance of gigantic flowers borne on long stems. There are many early flowering varieties in this mixture and if sown early will soon begin to bloom and produce an abundance of flowers all summer. More than seventy different named varieties have been put in this great mixture. Be sure and try it. Pkt. 6c; 3 pkt. 15c; oz., 20c; 1/4 lb. 75c, postpaid.

**GIANT FLOWERING MIXTURE SWEET PEAS**

JAPANESE CHRYSANTHEMUMS MIXED VARIETIES AND COLORS

Our assortment of seed includes all the best Japanese varieties from Japan, among which is the Ostrich Plume sort that is twisted and curled and in all delicate colors imaginable. We also include the Annual kind that produces very large flowers of crimson, gold and white colors. These are easily grown from seed, and many of the plants can be taken inside and will bloom during the Winter Pkt 10c. 3 pkts 25c

DAHLIAS DOUBLE FLOWERING MIXTURE

Mixed Dahlia

Dahlias

Good Dahlias can be grown from seed, and plants will bloom the first season from seed. Anyone who can raise a Zinnia or Morning Glory can grow Dahlias from seed. They are remarkably easy to germinate. Seed sown in the house in March or April will produce flowering plants as soon as plants grown from tubers. Some of the finest, largest Dahlias, and the richest colors we have ever seen were among seedlings. Out of a large paper of seed, no two plants will be alike in flower, while there will be every color represented from snow-white to black-maroon. Plant a packet of this seed and the beautiful flowers you will get will make you a Dahlia lover. Mixed colors. Pkt. 10c; 3 pkts. 25c.

CHINESE LANTERN PLANT

When treated like a tomato it grows and fruits freely from seed the first season. Produces numerous large unfolded husks, the shape of Chinese lanterns, at first a beautiful green color changing to yellow and, then to bright scarlet. For pies, or dried in sugar for fruit cakes or puddings. It is most delicious. It is a Japanese production and easily grown in any garden. Try it. Pkt. 6c., 3 pkts. 15c. postpaid

CHINESE LANTERN PLANT

SELECTION FROM ALL COUNTRIES WHERE GOURDS ARE KNOWN

Here is a wonderful mixture of rare, strange, curious Gourds one would never think of seeing. The colors, shapes and sizes would astonish you. Just the seed you will want to plant for a curiosity. Contains about all there is in the way of gourds. Pkt. 6c., 3 pkts. 15c., oz. 25c. postpaid.

JAPAN FANCY PICKLES

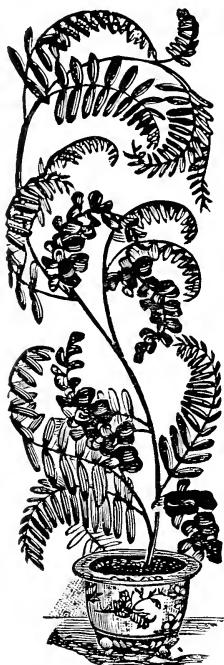

Fancy Pickles The most perfect strain of pickles ever produced in America. They are perfectly symmetrical in shape and no thick ends, and no small or pointed ends. A marvel of beauty during the bearing months. They are very quick growing, and a fine sort for slicing. Pkt. 5c; oz., 15c; lb. 45c, postpaid.

JAPANESE BABY ROSE FROM SEED

This is a wonderful rose. It will produce semi-double and double flowers from 2 to 3 months after sowing seed. Long before that, however, when the plant is not over 1½ inches high, and having 2 to 3 very small leaves, it will throw off from 1 to 3 single flowers about the size of strawberry blossoms, but much more delicate, and very attractive as it plainly shows the true rose bush type. With the increase in size of the plant, the blossoms increase until it is a magnificent sight. It is a hardy hybrid perpetual everblooming rose, sure to be in bloom from spring until winter. The seed is mixed and from one packet of seed you will get pink, crimson, white and various shades. Pkt., 10c; 5 pkts., 25c.

THE ORIENTAL WEATHER PLANT

WEATHER PLANT

A beautiful flowering vine with fern-like foliage and clusters of flowers. It is claimed the leaves by changing their position foretell the weather two days in advance. If leaves stand upward from the twig at an angle of 45 degrees, the sky will be cloudless and weather beautiful. If they stand out straight changeable weather is indicated, or if the leaves droop down, indications are rain. When leaves are hanging straight down it indicates very wet. Pkt., 8c; 8 pkts., 20c.

CAULIFLOWER

One-half ounce of seed will produce about 500 plants; three ounces make enough to set out an acre. For Spring planting sow in January or February in gentle hot beds or cold frames. For field culture, sow and give the same treatment as for Early and Late Cabbage. They require plenty of manure and good culture. After they begin to head, fasten the leaves together over the tops, so as to protect from sun and keep white.

SMITH'S EARLY SNOWBALL—The best variety for general use. Of dwarf habit, and produces fine, white heads in a very short time. Always tender and sweet; an excellent sort for either spring or fall planting. Our seed is grown in Denmark by a specialist and cannot be surpassed. Pkt. 15c; 1/4 oz., 60c; 1 oz., \$2.00, postpaid.

THAT ALL SHOULD TRY

FRENCH MAMMOTH WHALE SQUASH

A giant Squash from France, often growing over three feet in length, specimens having been grown to weigh over 100 pounds. The flesh is solid, of a rich orange color, of good quality, and a remarkable keeper. A squash that will cook tender and dry as any small Domestic Variety. A wonder of the present day—Seed carefully select for our customers. Pkt. 10c; 3 pkts. 25c, postpaid.

THE GREAT PRIZE TAKER ONION

This is a great Onion, and it is hard to equal the genuine Prize Taker. We consider the Prize Taker is by far the handsomest, most productive, most popular and best of the Globe Onions today. Prize Taker produces large, handsome bulbs of superior quality and grows very uniform in size, nearly a perfect globe as shown in the illustration. It has a very small neck and always ripens up hard and fine without any stiff necks. The skin is of a bright straw color and presents a handsome appearance in market. The bulbs grow to an enormous size, often measuring 10 to 15 inches in circumference and attract a great deal of attention in any market and can be sold at a better price than any other variety we know of. The keeping qualities are excellent and the bulbs appear to be as firm and solid in the spring as when put away in the fall. Pkt. 10c; oz 25c; 1/4 lb. 75c, postpaid.

Use Order Sheet when ordering and try some or all of these choice selections of Oriental and Domestic Novelties—all carefully selected. See for yourself what other countries have in the way of vegetables and flowers.

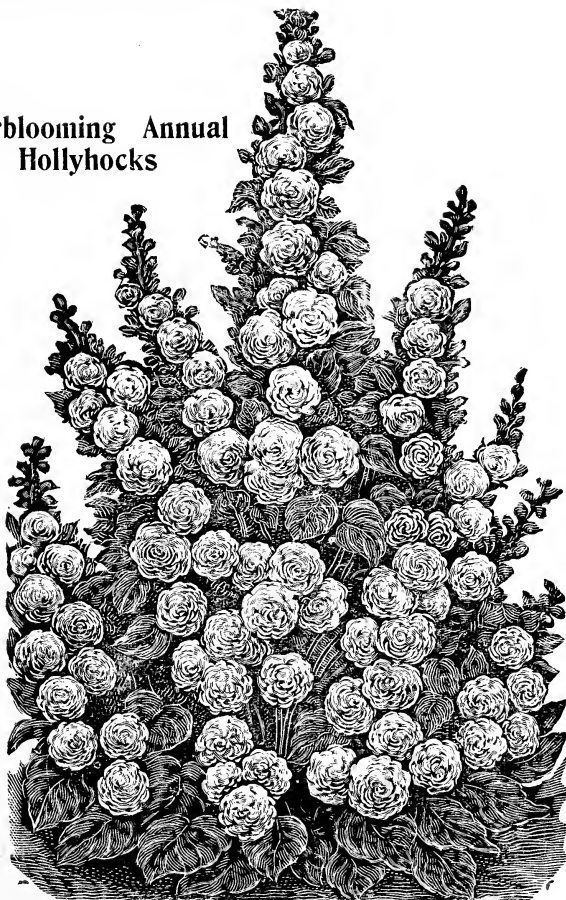

LARGE FRENCH STRAWBERRIES

Have you ever heard of the French Strawberries, which can be grown from seed? If not, you should certainly grow them this year. Their great size and luscious sweetness will surprise you. We want all our customers to give them a trial this year.

Seed should be sown early in hot bed or in open ground in a seed bed soon as weather will permit, and when young plants are well started transplant in rows 3 feet apart and 2 feet in the row.

We have been very fortunate in securing a limited supply of the seed, all imported from Europe, and we believe it will please every one. Order your seed now. Pkt. 10c., 3 pkts. 25c.

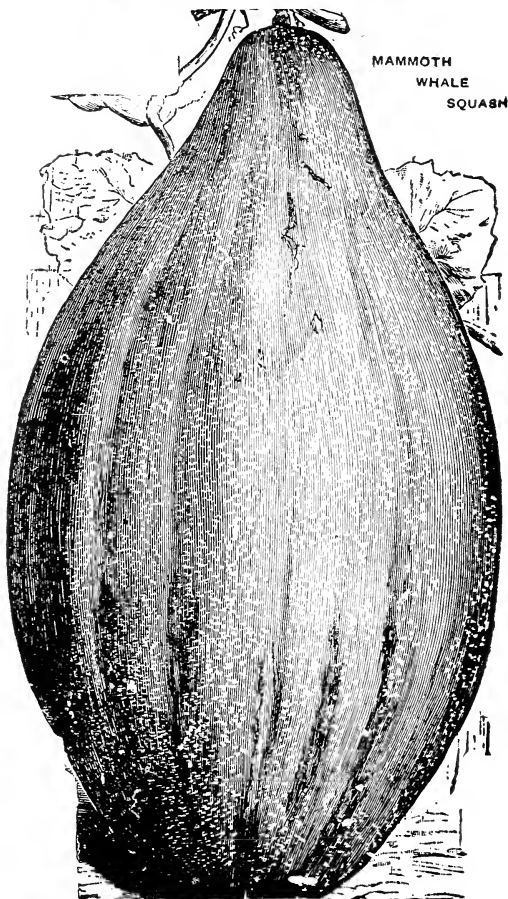

Everblooming Annual Hollyhocks

You can sow the seed in the Spring and have a gorgeous display of flowers through the Summer and Fall. They bloom in about 12 weeks after the seeds are sown and bloom till the frost kills them. The flowers sometimes measure 5 inches across and have many colors. Double, semi-double, single, saucer-shaped, fringed and edged, with odd and curious shaped flowers that will surprise you. Pkt. 10c., 3 pkts. 25c.
